EXPERIENCE

Software Development Engineer | Amazon (Audible) Aug. 2022 – Present
Java, Python, JavaScript *Newark, NJ*

- Created promotions on Amazon for Audible audiobooks generating over four million dollars in revenue
- Implemented internal website for marketers to create promotions resulting in over two hundred hours of work reduced per month
- Created testing environments to preview promotion changes before going public preventing an average of three bugs per promotion launched
- Enforced better coding practices and implemented unit and integration tests reducing errors in production by 20%

Software Engineer Intern | JPMorgan Chase & Co. Jun. 2021 – Aug. 2021
JavaScript, React, Python *Wilmington, DE*

- Developed internal executive report website to aggregate data on all lines of business for C-level executives
- Created export to PDF function removing the need for manually transferring data to physical report saving over 20 hours of work per month
- Improved navigation by implementing a search function utilizing natural language processing resulting in finding data 3x faster
- Worked on CI/CD pipeline with Jenkins to deploy code to production

EDUCATION

Bachelor of Science in Computer Science May 2022
West Chester University of Pennsylvania *West Chester, PA*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, HTML/CSS, SQL (Postgres)
Frameworks: React, Next.js, Node.js, Sass, Tailwind CSS, Flask, JUnit, Enzyme, Cypress
Developer Tools: Git, Docker, Unix/Linux, Amazon Web Services, Atlassian Suite

PROJECTS

Movie Magic | TypeScript, Next.js, Sass

- Search for movies based on parameters such as actors, director, genre, year released, and more
- View movie search results to read descriptions, see statistics, and watch trailers
- Look at list of cast and crew members and see their profile
- Explore cast or crew profiles to see biographies and lists of movies that were worked on

Personal Website | JavaScript, React, Tailwind CSS

- Built personal website to host resume and social links
- Designed accessible and responsive front end using React and Tailwind CSS
- Includes a page listing project demonstrations and descriptions
- Utilized dynamic backgrounds and animations to create a fluid user experience

EriTea | Liquid, JavaScript, Sass

- Developed e-commerce website for drink brand EriTea
- Features product pages, ad copy, and the founder's story
- Implemented direct-to-consumer online ordering system using Shopify
- Includes contact form for customers to reach out to support
